Halifax Humane Society (HHS) Animal Metrics

Intake Data Analysis

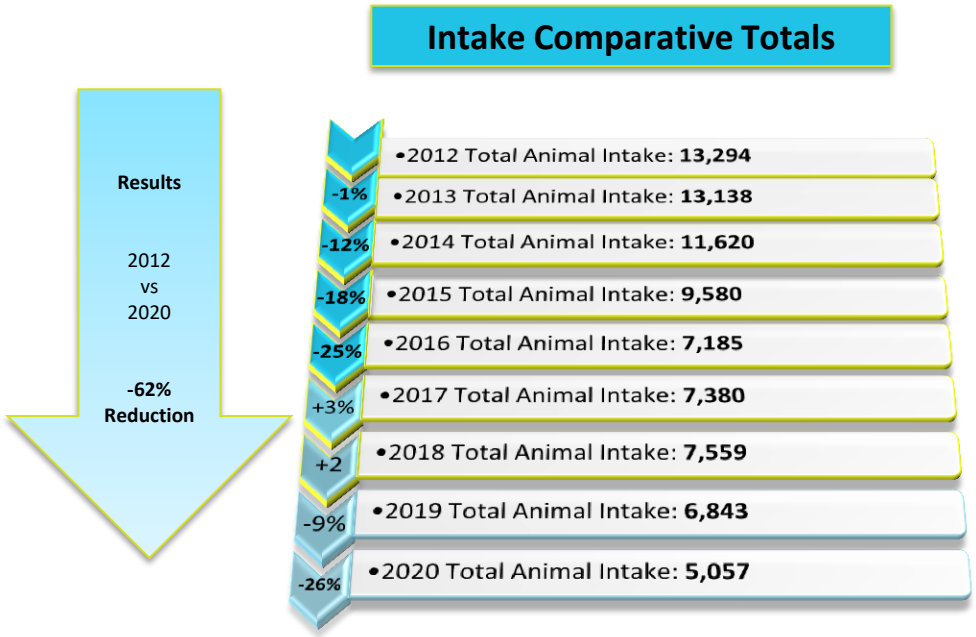

The following information contains a progress report for HHS intake animal metrics. Each year data collected is analyzed to identify trends and progress made in efforts to responsibly reduce animal intake and ultimately improve care for animals within Volusia County.

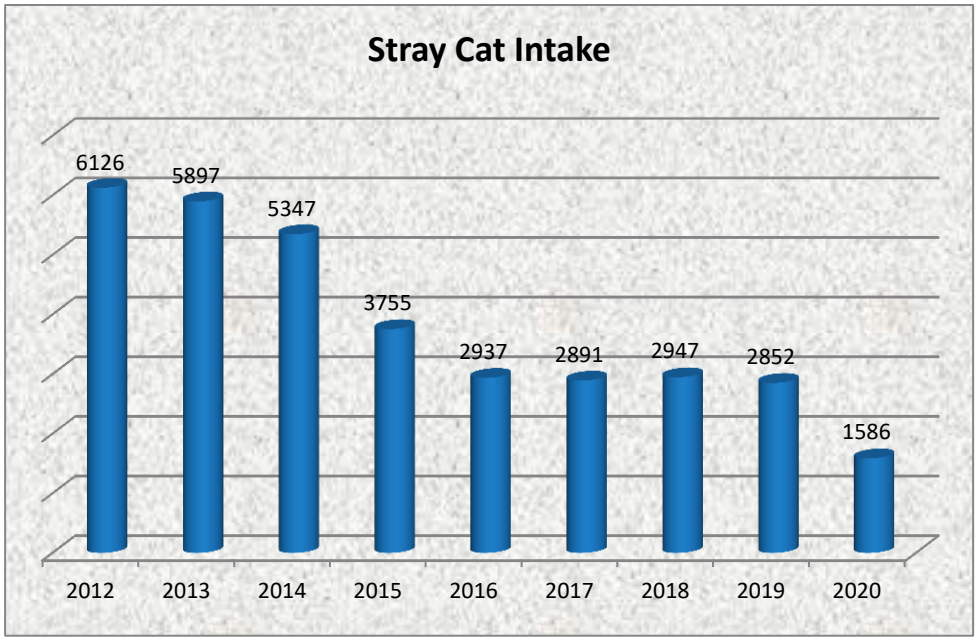

In a 9 year period of time, subsidized or free **sterilization surgeries** have **increased by 117%** since 2011, prior to the opening of the HHS Redinger Spay/Neuter Clinic in 2012. This is the single most important contribution to the overall improvement in intake numbers throughout the community.

Compiled data indicates great strides in the reduction of HHS largest animal intake population: cats. Our goal is to find a home for every healthy, adoptable animal in the Greater Daytona region without closing doors, without leaving animals in need to fend for themselves.

HHS Animal Intake is showing a **decrease** of -**26%** in 2020 from the prior year. Further analysis reflects a yearend total decrease of **-44% in stray cat** intakes and **overall stray intakes are decreased by -35%**. Other comparatives show in 2020 a total of **-62% decrease of intake compared to year 2012**.

The following pages contain a detailed breakdown of intake categories. Reporting is completed on a monthly basis and may vary slightly from end of year totals as corrections are made.
