Halifax Humane Society (HHS) Animal Metrics

Outcome Data Analysis

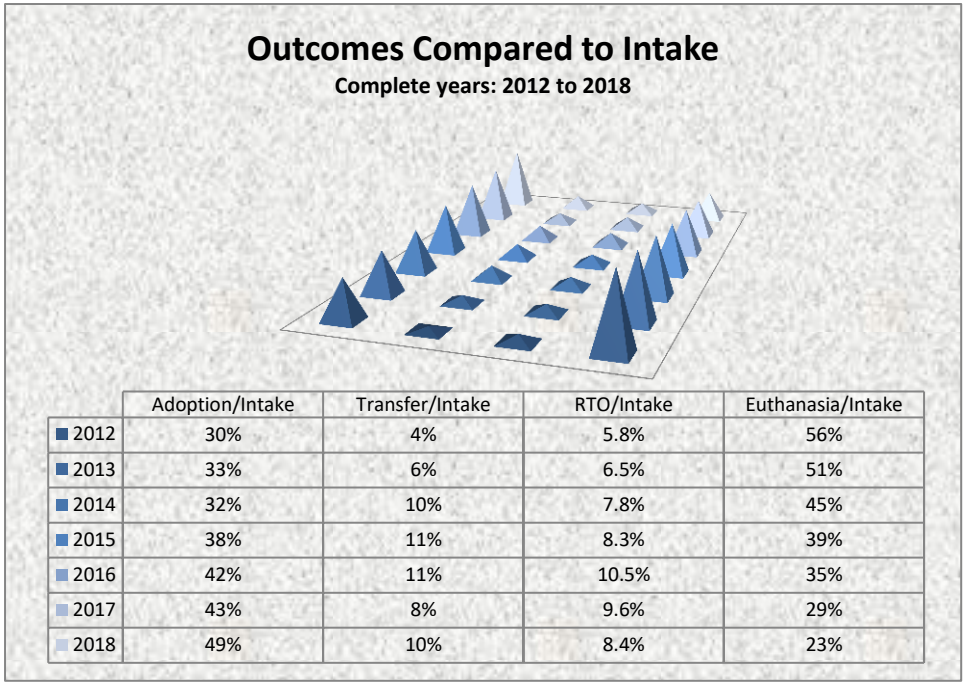

HHS Adoptions, Transfers and Return to Owner (RTO) are all in direct correlation to the decrease shown at intake. This means, that less animals coming in will ultimately affect the number available for outcomes. While the raw numbers *may* show a decline, in actuality, outcome category percentages compared to intake are showing positive trends overall respectively.

Through great efforts, Adoption compared to intake continues to increase each year showing 2018 at 49%. Transfer-out percentages compared to intake in 2018 reflect an increase to 10%. Focus is directed to increase network abilities including the help of social media. **Additional comparisons reflect Transfer's compared to Animal Intake have more than doubled since 2012.**

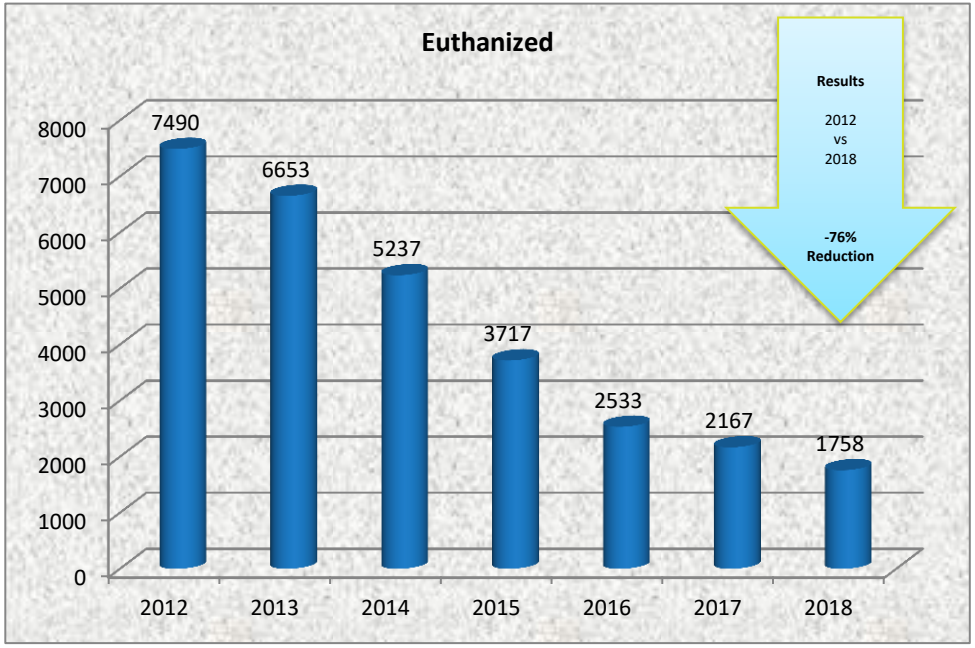

Return to Owner (RTO) metrics are in direct correlation to the overall reduced intake. Upon further examination, this percentage compared to intake has experienced a slight decline, however is still reflecting positive gains in this area also. Efforts made in 2015 resulted with the addition of lost animal page going live on the HHS website.

Euthanasia numbers continue to decline bringing HHS closer to achieving its goal of responsibly finding positive outcomes for as many place-able animals as possible. **2018 shows a -19% decrease from 2017 and a -76% decrease from 2012**. With comparison to Intake, this is the one category where a decrease is the desired results and comparisons are showing a steady decline each year. Through increased program application, HHS has turned the corner from being a shelter that was only reactive to the overwhelming number of animal entering the shelter each year to a proactive approach of addressing the real issues at hand, pet overpopulation.

The following pages contain a detailed breakdown of outcome categories. Reporting is completed on a monthly basis and may vary slightly from end of year totals as corrections are made.
