

Halifax Humane Society (HHS) Animal Metrics

The following information contains a progress report for HHS intake and outcome animal metrics. Each year data collected is analyzed to identify trends and progress made in efforts to responsibly reduce animal intake and ultimately improve care for animals within Volusia County. In a 8 year period of time, subsidized or free sterilization surgeries have **increased** by **124%** since the opening of the HHS Redinger Spay/Neuter Clinic in 2012. This is the single most important contribution to the overall improvement in intake numbers throughout the community. Listed below, data indicates great strides in the reduction of HHS largest animal intake population: cats. Our goal to find a home for every healthy, adoptable animal in the Greater Daytona region is closer than ever.

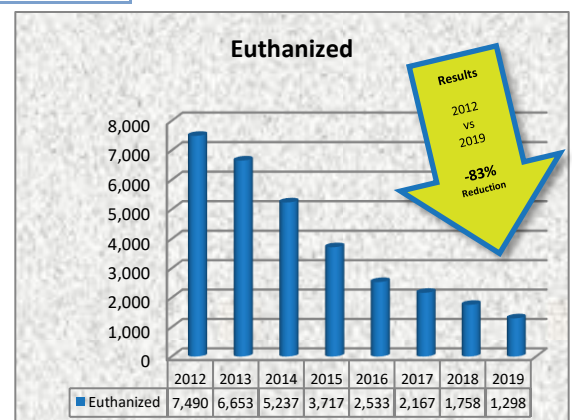

HHS Animal Intake is showing a **decrease** of **-9%** in 2019 from the prior year. Further analysis reflects a yearend total decrease of **-3.2% in stray cat** intakes and **overall stray intakes are decreased by -6%**. Other comparatives show in 2019 a total of **-48% decrease of intake compared to year 2012**.

HHS Adoptions, Transfers and Return to Owner (RTO) are all in direct correlation to the decrease shown at intake. This means, that less animals coming in will ultimately affect the number available for outcomes. While the raw numbers *may* show a decline, in actuality, outcome category percentages compared to intake are showing positive trends overall respectively.

Year	Adoption/Intake	Transfer/Intake	RTO/Intake	Euthanasia/Intake
2012	30%	4%	5.8%	56%
2013	33%	6%	6.5%	51%
2014	32%	10%	7.8%	45%
2015	38%	11%	8.3%	39%
2016	42%	11%	10.5%	35%
2017	43%	8%	9.6%	29%
2018	49%	10%	8.4%	23%
2019	50%	13%	9.9%	19%

HHS Euthanasia numbers continue to decline bringing HHS closer to achieving its goal of responsibly finding positive outcomes for as many placeable animals as possible. **2019 shows a -26% decrease from 2018 and a -83% decrease from 2012**. Through increased program application, HHS has turned the corner from being a shelter that was only reactive to the overwhelming number of animals entering the shelter each year to a proactive approach of addressing the real issues at hand, pet overpopulation.

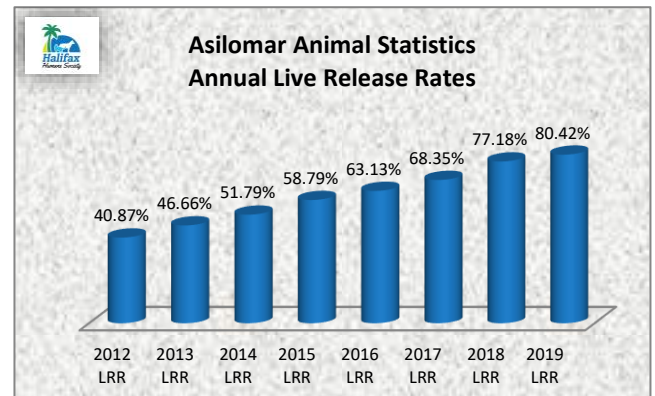

Aslimor Accords Animal Statistics – Live Release Rates (LRR): The LRR report is reflective of Cat and Dog populations. This report is unique to animal welfare organizations as statistical data takes into account the medical and behavioral condition of animals.

	2012 LRR	2013 LRR	2014 LRR	2015 LRR	2016 LRR	2017 LRR	2018 LRR	2019 LRR
January	48%	48%	64%	64%	74%	59%	84%	83%
February	45%	55%	57%	69%	69%	67%	81%	84%
March	47%	61%	55%	68%	73%	73%	84%	83%

December	49%	62%	62%	68%	76%	80%	92%	86%

Lowest Month of the year

Highest Month of the year

Historical Comparatives are measures used that compare 2019 to a year with comparable animal intake jurisdictions. This comparison gives a true gage of program effectiveness over the years.

Animal Statistics for 2007

Total Animal Intake: 17,177
 Total Animal Adoption: 2,885
 Total Animal Transfer: 45
 Total Animal Euthanized: 11,760

Animal Statistics for 2019

Total Animal Intake: 6,843
 Total Animal Adoption: 3,396
 Total Animal Transfer: 897
 Total Animal Euthanized: 1,298

Comparative Results

Intake: Decrease -60%
Adoption: Increase +18%
Transfer: Increase +1,893%
Euthanized: Decrease -89%
